
AUDIOMETRY WITHOUT BOUNDS

AUTOMATED GROUP TESTING

Test and monitor up to seven individuals simultaneously

MANUAL AUDIOMETRY

Control stimuli presented

FIT TESTING

Measure Personal Attenuation Rating of in-ear hearing protectors

WAHTS & AUDHERE

Occupational hearing testing and hearing protector fit testing are easy and efficient with the **WAHTS** headset and **audhere** app. The WAHTS is an OSHA- and ANSI-compliant calibrated headset with a built-in wireless audiometer. The WAHTS earcups attenuate sound on par with a single-walled sound booth. Pairing with the audhere app makes it easy to manage automated testing of groups or conduct one-on-one testing for individual needs.
